NOTE: Please use new "Notice of Award Number" fields below for correct formatting.

Notice of Award Number:

Notice of Award Number:

Amendment Type	Main Grant Number	Budget Period	Amendment Number
1-digit number (no letters). Typically 5, 6, or 9 but can be others. *required	12 Digits; Will always start off 'NU50CK000' and then have 3 numbers (no letters) at the end based on the recipient. *required	2 digits; Will always start with '0' and the second of the 2-digits will be the budget period in which the award was made. For example: Enhancing Detection was a BP1 award so '01'; whereas, the BP2 continuation funding is a BP2 award so '02'. *required	2 digits; Will always be a 2-digit number (no letters). *required
6 0 characters remaining	NU50CK000500 0 characters remaining	03 0 characters remaining	03 0 characters remaining

Formatted NOA Number: 6 NU50CK000500-03-03

Is this request related to 2019 Novel Coronavirus (2019-nCoV)?

* must provide value

Yes No

Reason for redirection, highlighting benefits

* must provide value

The funds amounting to \$109,736 were not approved. Line items E1 and S1 were moved to O1 (other). We are requesting funds from O1 (\$109,736) to be redirected to equipment.

1. Move 100,000 from O1 to equipment for E.4. The Montana State Prison (MSP) has developed a plan to improve confinement facility preparedness and response efforts to respond and mitigate the spread of a virus. In order to support these practices, especially during an emergency power outage, MSP would like to request the use of these funds to purchase a generator. The MSP will need

the generator to operate the equipment used to screen inmates, staff and visitors to help reduce the virus risk within a congregate setting. The generator is also needed in emergencies to operate the sanitization equipment, lighting for diagnostic and screening testing, and telephones for contact tracing. In order for MSP to meet inmate needs resulting from COVID-19-related limited/restricted mobility and/or access to the facility, MSP has made significant investment into the equipment and infrastructure needed to utilize video conferencing technology and other measures for attorney/client purposes, court appearances, family visiting, programming and telehealth. MSP would, however, be unable to provide uninterrupted services during an emergency power outage without the generator. It is also essential to have back up power supply for offenders who are ill and requiring the use of equipment to main their health status, equipment such as oxygen concentrators, which with Covid-19 the demand for oxygen use in the infected patients has increased tenfold. Without the ability to provide uninterrupted power and delivery of needed medical treatments, poor patient outcomes may occur. The State of Montana's procurement process will be followed for this purchase. At a minimum, three bids will be solicited, and the lowest bidder will win the purchase. In addition, the Clinical Services Division (CSD) Health Care Manager and the core team will work with on-site staff at MSP to ensure a generator is placed in the proper location and allows for the use of the sanitizing equipment, power for diagnostic and screening testing, contact tracing, programming and telehealth within the congregate living facilities in the event of a power outage.

2. Move \$9,736 from O1 (other) to equipment. Please see the following statements for the need of redirection of funds. The Montana State Prison (MSP) is the state-owned facility for the male inmates in the custody of the Montana Department of Corrections. This population includes many high-risk and elderly inmates, with complex medical issues. The MSP campus provides on-site care of inmates in the infirmary 24-7. The inmates are housed in different living units and work in various areas spread across a 68-acre campus. In order for the infirmary to adequately respond to emergent medical requests and provide timely emergent care for the inmates, it is necessary to transport the inmates from the various locations to the infirmary for care. To prevent the spread of COVID-19 during transport, MSP is requesting funding to purchase an emergency transport vehicle with wheelchair accessibility and has isolation capabilities, as well as ambulatory emergency type capabilities and equipment for staff to respond timely to an emergency to provide quality care for a critically ill patient. This vehicle will allow the safe transport of inmates as well as protection for the transport operators. The State of Montana's procurement process will be followed for this purchase. At minimum, three bids will be solicited, and the lowest bidder will win the purchase. A more competitive bidding process may be used, to ensure the most qualifying vehicles are purchased.

Insert statement specifying if redirection remains within the scope of the program announcement and will be used to support the ongoing activities of our cooperative agreement

* must provide value

The redirections remain within the scope of the award.

If applicable, insert statement and provide the new, approved and negotiated indirect cost rate agreement. If no change is required, state "Indirect costs have not been affected by this redirection of funds."

* must provide value

There are no impacts on indirect costs due to the redirection of funds.
